Towering far above her neighbors,
Shop and mart and hall,
Stands the home of student labors,
Noblest of them all!

At each meeting, give her greeting
Raise the proud salute!
Hail to thee our Alma Mater
Hail, Pratt Institute!

In our hearts her precepts linger
Her example gleams,
Showing with unerring finger
Guerdon of our Dreams.

At our meeting for our greeting
Bring her noble fruit,
Hail to thee, our Alma Mater
Hail, Pratt Institute!

Round the world the chain extending
Each to the other binds,
All her honored name defending
Hearts and hands and minds.

At our meeting, give her greeting
Raise the proud salute!
Hail to thee, our Alma Mater

TO MARGARET A. MIDDLEDITCH
REGISTRAR OF PRATT INSTITUTE

Who by her gracious presence interprets Pratt Institute to all who come, welcoming, directing, helping inquirers, guiding and counselling those in uncertainty; hearing with sympathy and advising with understanding those who are troubled, inspiring all who have or need inspiration, they who have thus been made glad dedicate the 1934 PRATTONIA.

HAROLD IRVING PRATT
SON OF THE FOUNDER OF PRATT INSTITUTE

Whose deep concern for the Institute and friendly solicitude for its people, and whose counsel in its affairs through the years of its history have been vital and unremitting, as a member of the Board of Trustees and as Treasurer of Pratt Institute.

FOREWORD

To fulfill its purpose a year book should reflect as true and complete a picture as possible of the school and all that goes on therein. In Pratt Institute the interests and activities are so varied and numerous, the task of recording them, so that each is given true justification, is almost impossible

However, considering the little space allowed, we feel our efforts have not been in vain, and that the pages to follow shall serve to keep the memories of these days at Pratt alive and undimmed by time.

It is the contention of the Prattonia Board that without the traditional spirit of that great Clan, the Pratt Student Body Prattonia could never have been perpetuated in such trying times as have existed, but this Clan has looked upward and taken this, its Annual, as means of proving its optimism and aggressiveness. The Board extends to each and every member its gratitude.

To the Faculty Advisors, Mr Petersen, Miss Duntz, Mr MacKenzie Mr Gordon, and Mr Stevens, who have been a guiding hand through many trials, is accorded the greatest of appreciation.

To Prattonia's Class Representatives, upon whose shoulders rested no little responsibility and worry the Board expresses its great indebtedness.

A word of thanks is extended to those concerns who showed such interest while helping to produce this Prattonia:

THE SCHOOL OF SCIENCE AND TECHNOLOGY

Recent years have witnessed many improvements in the School of Science and Technology, the better to meet current changes in general conditions and to carry Pratt Institute's traditions serviceably forward into the era that lies before us. Applying to last fall's day school entrants, we have lengthened our engineering courses by the addition of a third year with proportionate amplification of subject content, as demanded by the modern development of industry, technology and science, and by the national trend toward a more liberal education. Our continuing purpose here is to make available a thorough, higher technical education in the shortest time consistently possible, providing for the more serious student whose need is for an altogether adequate training and to whom economy of time and money is an important consideration. These newly adopted three-year courses retain the general character and proven efficacy of their long existent two-year predecessors, whose several thousand living alumni are achieving notably successful careers, aided by the training and inspiration they received at Pratt Institute. To the more than two hundred worthy members of the graduation class of 1934, we now turn in confident expectation of accomplishments that will sustain and add to the proud record of the School and its graduates of past years.

INDUSTRIAL CHEMICAL ENGINEERING II

We're off!

With the thrilling cry the barrier lifts, and a crowd of energetic and optimistic boys swing in to action, and pound down the stretch, past the grandstand of instructors who in turn voice their applause or disapproval. A sudden flash of speed! As yearlings, we are off to a good start. We settle down to a steady gait, reeling off the first year furlong in fast time. The class, closely bunched, sweeps up the backstretch with no particular pupil outstanding. The race is very very close. See how we hang to the rail. It is a good field, one of the best ever to prance at the barrier in the famous Chemical Derby.

Certain individuals in the massed field forge away to the front. Leaders in baseball, basketball, swimming, bowling, club work, student council, and other activities lend a stride to the rapidly progressing field. Still the pupils have shown no inclination to tire. On and on. Now we are past the grueling backstretch of senior trials. Into the stretch just completed pounded one of the greatest classes ever to contend for the Certificate Award. But even now the race is far from finished, for we are facing the last lap—the race of Life. May we run it straight and true as we—the Seniors of 1934—ran to set a record at Pratt. With perseverance, ability and manner we set out for our greatest purse, Success.

INDUSTRIAL ELECTRICAL ENGINEERING II

The class of '34 started out quite auspiciously as Pratt Institute's last two year class in the School of Science and Technology. We started out as Electricals, but within a few short weeks found ourselves in the midst of weirs, roof-trusses, sand-molds, oxy-acetylene torches, band-saws, and test tubes. Despite protests, we suffered this ignominy until the summer vacation came and went in great speed.

When we returned for our second and last year, some ventured to assume that we would begin to learn something new about electricity. To our amazement, we did! In fact, many complained that the faculty was evidently making up for lost time. Upon closer investigation, however, we found that, as usual, we were wrong. We were simply getting our first tastes of the rapid pace which was to continue for many months.

As time passed, more and more emphasis was laid upon Engineering—Engineering in its broader aspects. More and more were we impressed by the fact that a successful engineer, no matter in what field, had to have a broad training—that he must be able to do more than juggle a slide rule, interpolate logs, or hook-up his equipment.

Many difficulties which beset our path were overcome, some scholastic, a few financial. Only now, as we regretfully take leave of the Institute, do we begin to appreciate the encouragement and unselfish, whole-hearted kindness of those whom we count among our greatest friends—our instructors.

127 West 62nd St., New York, N. Y.
Associate Editor "Electrical Echo" Class Representative Athletic Council; Class Basketball, 1933-34; Vice-Chairman A. I. E. E.
One of the main supports of the A. I. E. E. Another hard-working fellow of whom Pratt will be proud.

Ed

BENSON, EDWARD B.
1804 Park Ave., New York, N. Y.
Class Vice-President, 1934.
The world little knows its greatest men. The boy who always figures his next step so thoroughly. We predict a great future ahead for Ed.

Ed

BERGSON, STEPHAN J.
29 Bethune St., New York, N. Y.
Editor "Electrical Echo" Phi Upsilon Omicron.
Resourceful and aggressive, Steve knows what he wants and usually gets it. Keeps up with the times with the "Times."

Steve

BLANK, HERMAN H.
64 Adams St., Hartford, Conn.
Phi Upsilon Omicron, Class Soccer 1933-34.
Our Herm is the ideal student, quiet, earnest and industrious. Let his motto be yours—"Results not excuses."

Herm

BREMMER, ALFRED J.
3 Hurley Ave., North Plainfield, N. J.
Technical Editor "Electrical Echo" Phi Upsilon Omicron.
A big radio man from Plainfield. One of our hardest workers, he goes about his work with precision and accuracy.

BUHLER, LOUIS G.

Louis

283 Taaffe Pl., Brooklyn, N Y

Class President, 1934; Swimming 1933-34.

Our genial class president—diplomatic, modest, helpful, and best of all likeable. Three cheers for Louis!!!

CAMERON, WILLIAM S.

Bill

Pearl River N. Y

Bill is our idea of a good fellow. He goes about his work in a quiet way but he gets results. Perhaps he does his home work on the Erie, commuting from the wilds of Pearl River.

CANDE, ZACHEUS H.

Zac

Sheffield,, Mass.

Manager Swimming Team, 1933.

When it comes to helping the other fellow Zac is always on the job. His frequent motorcycle trips home are merely indications of his sense of equilibrium and level headedness.

CARBONE, VICTOR T

Vic

57 Rockaway Ave., Brooklyn, N Y

Manager Class Basketball, 1933-34; Chairman Dance Committee.

Vic's combination of dancing technique and black wavy hair certainly gets em—even redheads, curse him, curse him.

COKINDA, ROBERT M. JR.

Bob

200 West Merrick Rd., Freeport, L. I., N. Y

Orchestra, 1933-34; Boxing 1933.

Bob is another of the class musicians. Always wears a smile and a snappy necktie. Has hosts of friends and he justly deserves them.

CONCANNON, JOHN F

Jack

64 East St., South Portland, Me.

Class President, 1933; Varsity Baseball, 1933-34; Class Basketball, 1933.

Although John comes from far-off Maine, he can still show the city slickers a few things, not only on the baseball diamond, but in the classroom too.

CONCHILEK, ARTHUR

Czar

24 Chapel St., Islip, L. I., N Y

Class Basketball, 1934.

If you're stuck look him up. If he can't help you he'll at least be sympathetic. Always good-natured.

CONDUCT JOSEPH J.

Shorty

1848 Monroe Ave., Bronx, N. Y

Varsity Basketball, 1933-34; Varsity Baseball, 1933-34. Don't let the size fool you—Joe is the Electrical's only two-letter man. Besides being active in sports, Joe manages to keep up his scholastic work, a real go-getter.

CONLON, JOHN L.

INDUSTRIAL MECHANICAL ENGINEERING II

Early in September of 1932 we entered Pratt Institute, a class of one hundred young men, filled with the hope and ambition of becoming Mechanical Engineers.

Our part in athletics during our first year was exemplified by the spirit and determination with which our soccer, swimming basketball, and bowling teams entered inter-class competition.

We made our social debut by giving a dance in the spring of our first year. This dance gave us the experience around which we built our later successes.

The student branch of the American Society of Mechanical Engineers, under the able leadership of the officers elected in the latter part of our first year has functioned to the advantage of the members of our class. Its activities, including inspection trips to industrial plants in and around New York City have been participated in by many of the members of our class to their benefit.

In the fall of our last year we continued our social activities by giving a dance which was a great social and financial success.

Since entering Pratt Institute, we have made many contacts, acquaintances, and friendships which will last a lifetime. Upon graduation this June, we will separate and go our various ways in the world, aided and abetted by a sound engineering education and by the thought that these friends that we have made during our all too brief stay here will be ready to lend a hand if the occasion arises.

Bill

103 Glen Rd., Woonsocket, R. I.
Prattonia Representative, 1933; Prattonia Editor-in-Chief, 1934; Glee Club, 1933-34.

A man in and about school always on the go. He lays his plans weeks ahead and sticks to them. Until his hands are free from work he can enjoy no fun. What! R. I. again this week-end?

BIALOGLOWIEC, EDWARD S.

Ed

430 Van Siclen Ave., Brooklyn, N. Y.
Class Baseball, 1933-34; A. S. M. E. Program Committee Chairman, 1934.

Ed is one strong and silent man who comes in handy when running lab. experiments. Has his own laboratory home and spends his spare time writing for catalogues.

BISHOP FREDERICK W

Fred

282 Willow St., New Haven, Conn.
A Connecticut boy who thinks that a Brooklyn girl is the cream of the crop. Don't let that iron grasshopper throw you, Fred.

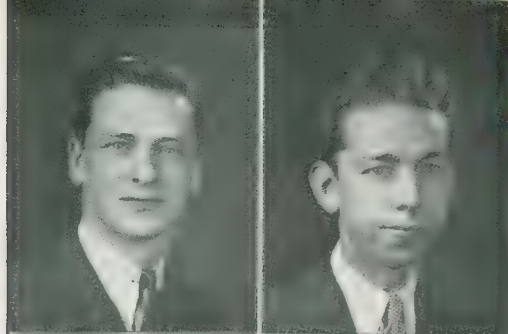

BLOUNT, GEORGE E.

Shorty

417 South Quaker Lane, West Hartford, Conn.
Class Vice-President, 1933; Swimming Manager 1933; Class Soccer 1933; Class Dance Chairman, 1933; S. & T Convention, 1933; Assistant Literary Editor Prattonia, 1934.

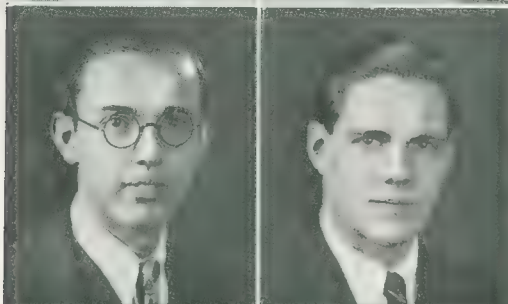

Well, George, Hartford may be all right but too much advertising will ruin even a good product.

A. J. CHEVROLET

BOOTH, ROBERT L.

Lee

651 Decatur St., Brooklyn, N. Y.
Class Swimming 1933-34; Class Baseball, 1933-34;
Class Basketball, 1934.
Bob spends all his time writing away from catalogues
and reading up on airplanes.

CASEY VINCENT D.

Vince

134 Van Nostrand Ave., Jersey City N. J.
More proof that a good little man is the best.

CHESTER, ALAN K., JR.

Ches

21 Burt's St., Lynbrook, L. I., N. Y.
Another commuter consequently little is known out-
side of the fact that when it comes to work—mass pro-
duction is what counts.

CHEVROLET ARTHUR J.

Chevy

2020 Camp St., Bronx, N. Y.
Art's a 1940 Model—'way ahead of us. Silent and
automatic but not an Electrolux.

CLARK, IRVING W

Irv

1235 Forest Rd., New Haven, Conn.
Phi Epsilon Omicron.
Organization, hard work and a good mechanical rea-
soning predominate in Irv. We look for a success-
ful career in this classmate.

CLARKE, JOHN J.

Clarkey

Hoosick Falls, N. Y.
Athletic Council, 1933-34; A. S. M. E. Inspection Trip
Committee, 1934; S. & T Convention, 1934.
A wizard in the shops and no slouch in the class-
room. One fellow that can keep his car running—
except when his tires are slit.

COCHRANE, JAMES

Jimmie

R. F. D. No. 3, Peekskill, N. Y.
One man who can bury his trials and tribulations
under a beaming countenance. We don't think
"Jimmie" will ever feel down in the dumps.

CONSTANT, HERBERT G.

Herb

100-67 224th St., Queens Village, N. Y.
He had a car but found that taxis and Fords don't
mix well.

CRISANTE, ALFREDO M.

Cris

21 Evergreen Ave., Morristown, N. J.
Class Baseball, 1933-34; Class Soccer 1933-34.
Al doesn't claim to be a boxer but he's taught Vitiello
some new punches. Hey Al, pick on someone your
size—c'mon up and see us sometime.

DEERING, EMIL E.

DILLON, HAROLD I.

Hal

15 Sumner St., Montpelier Vt.
Glee Club, 1933; Class Basketball, 1933-34.
A married man from the wilds of Vermont—but have they personality—look at "Hal."

DRUCE, A. CURTIS

Curt

542 Central Ave., Albany N Y
Class Basketball, 1933; Assistant Literary Editor Prattonia, 1934; Band, 1933.
Curt gets a six-page letter every day and retaliates with a short note of five or six pages long. It might be love.

DUNLOP ROBERT H.

Bob

145 Halsey St., Brooklyn, N Y
Chuffer and nominal owner of the Pratt bus. Everybody owns the car Bob claims the ideal solution regarding lab. experiments is to ignore them.

EDWARDS, KENNETH

Kenny

136 Mill St., Springfield, Mass.
Class Soccer, 1933-34.
Happy am I, from care I'm free,
Why aren't they all content like me?

EHRLICH, BENJAMIN

Benny

481 Van Buren St., Brooklyn, N Y
Swimming Team Manager 1932; Class Basketball, 1932-34; Class Soccer 1932.
Benny is one of Brooklyn's own boys who will live to carry on the traditions of Pratt Institute.

ESSIG, WILLIAM C.

Bill

7605 10th Ave., Brooklyn, N Y
Class Basketball Manager 1933-34.
Bill's a Brooklyn boy and proud of it. He's one of Bill Lombard's most select wolves.

FALKENBERG, HAROLD H.

Moe

661 41st St., Brooklyn, N Y
Class Baseball, 1933-34; Class Swimming 1933-34.
Moe is the smallest man in the class but with the women he's simply colossal.

FOSTER, RICHARD E.

Dick

11 Burtis St., Lynbrook, N. Y
Cheer Leader 1933; Class Swimming, 1933; Class Dance Committee, 1933-34; Athletic Editor Prattonia, 1934; Vice-President Aeronautical Branch, A. S. M. E., 1934.
Dick is going into aviation upon graduation but he'll always have to come down to earth for his women. Independent and industrious—he's a "Champ"-ion through and through.

FOX, FRANKLIN H.

Frank

232 North Fifth St., Reading, Pa.
Silence is golden—we think this proverb was written especially for men like Frank.

FRANCE, ALBERT K.

1727 Union St., Schenectady N Y
'When work is done, one can then enjoy amusement best,' seems to be Al's motto.

O. J. GAMBALE

A. T. GERMANO

J. F. GIANCOLI

W. M. GIBBS

GAMBALE, O. JOHN

706 Sackett St., Brooklyn, N Y

Class Baseball, 1933-34.

Here is probably the quietest man in the class. He is reliable, conscientious and—what a pool player

GERMANO, A. THOMAS

Tom

105 East 116th St., New York, N Y

Tom was known as the "Shadow" during his first year. Quiet and retiring but some student.

GIANCOLI, JOSEPH F

Joe

52 W High St., Carlisle, Pa.

Class Soccer 1933; Varsity Basketball, 1933; Captain Class Basketball, 1934; Class Swimming 1934.

The young "Thunder Horse" plays a great role for a little fellow. No Mech class is genuine unless good old Carlisle shares the floor.

GIBBS, WALTER M.

497 Larch Ave., Bogota, N J

Good luck to Walter

He's one of our best,

He always manages—

To pass a test.

HAMMOND, WILLIAM D.

Bill

Wallaceburg Ontario, Canada

Bill is our post-graduate classmate. He is also Commodore of the Men's Club; more power to you, Bill. Don't get married too soon.

HASSELMAN, THOMAS W.

Tom

1823 Ocean Ave., Brooklyn, N Y

Associate Editor Mech. Review 1933; Business Manager Mech. Review 1934; Class Basketball, 1933-34.

"Let the world roll by" fits Tom to a 'tee.' He turns his head away from trifling troubles and assumes responsibility only of necessity. His Ford and his blondes occupy most of his time.

HATZFELD, GEORGE, JR.

Great Neck, N Y

Quietness, sincerity and steadiness.

George is sure to achieve success.

HAVEMEYER, GEORGE

Spike

1833 East 13th St., Brooklyn, N Y

Class Basketball, 1933-34.

Spike disagrees with Constant—he claims Auburn 12's as his nemesis.

HAYDU, JAMES W

Jim

47 Lenox Ave., Bridgeport, Conn.

Bowling and Pool Manager 1934.

Jimmy it is rightly said,

Though quiet as he be,

No matter how much work he does,

He only gets a "C."

HEGUY, PETER L.

Pete

36 Arden St., New York, N. Y

Class Basketball, 1933-34; Class Swimming 1933-34;

Class Treasurer 1934; S. & T Convention, 1934.

HOLLISTER, W HAROLD

Hal

14 Second Ave., Ilion, N Y

Class Basketball Manager 1933.

Hal has the tenacity of an octopus as far as ambition is concerned and lacks none of the essential characteristics of an engineer Good luck, Hal.

IRVIN, EARL H.

Judge

Mohawk Hotel, Brooklyn, N. Y

The judge is the grand old man of the class. His wide experiences and his ability to tell them make him a very interesting man to know

JAKOBY, ANTON

Jake

A successful engineer will surely be.

KAMPISH, NICK S.

Nick

214 East Lincoln Ave., Roselle Park, N. J.

Varsity Baseball, 1933; Class Baseball, 1933-34.

Nick is our satirist. Try as he may to conceal it under a blanket of silence, his trick smile deceives him.

KELLY, RAYMOND A.

Ray

1470 Dean St., Brooklyn, N. Y

Mr Dale has a poor memory, but one thing he'll never forget is our friend—44 CO.

KEPLER, DONALD A.

Don

30 Maplewood Ave., Maplewood, N J

Mechanical Dance Committee; Assistant Business Manager Prattonia, 1934; President Phi Upsilon Omicron Society 1934.

Don is our true example of manners and efficiency What women think of him is another thing. His technique has individuality

KLEINSCHMIDT, KENNETH T.

The type of fellow that everybody likes—"You nas-sty man, you."

LEADBETTER, GILBERT H.

Gil

109 Bay-View St., Camden, Maine.

Class Soccer 1932-34.

Gil, where have we heard that name?

Oh, yes! It's that little guy from Maine.

Three years he spent here, we understand,

And speaking of women—nuff sed—Amen.

LEE, HENRY B.

Henry

207 Grand Ave., Brooklyn, N. Y

Henry has a ready smile and a pleasing disposition
—enough to succeed in any place.

LIPPINCOTT, RICHARD P

Dick

318 Forest Ave., Oak Park, Ill.

Class Soccer 1933-34; Class Swimming, 1933-34.

Well, here comes Dick now for a lecture on boats.

Who knows, perhaps some day we can look up to him as an authority on the subject.

LOMBARD, WILLIAM S.

Bill

689 East 49th St., Brooklyn, N. Y

Bill Lombard, as he's generally known,
Is the established king of the optical engineer throne.
Mornings or noon the whole year around,
In front of the Art School he can be found.

McCLOUGHAN, CHARLES

Mac

14 Cottage St., East Norwich, Conn.

Another one of those quiet hard-working fellows Pratt
will boast of graduating. Mac will enter the Heat-
ing and Ventilating field.

MARRA, THOMAS A., JR.

Tom

42-11 172nd St., Flushing, N. Y

Toms in a bad predicament. He can't find any life
insurance company that will give him a policy which
is valid when he's driving a car

MERCER, HARVEY W.

Duke

Crompond Road, Yorktown, N. Y

Class Basketball, 1933-34.

He named himself "Duke," so by that name,

He hopes to lead a life of fame.

And when from school he will go

We know he'll guide the FORD to FLO.

MERCIER, ALONZO P

Al

83 Lawrence St., Hartford, Conn.

INDUSTRIAL CHEMICAL ENGINEERING

It seems hard to believe that already we are actually completing our first year as aspiring chemical engineers at Pratt Institute. Just nine short months ago we entered as a noisy carefree bunch—our only distinction being that we were the youngest class ever to tackle this course. Although we then knew nothing of Pratt ideals, or what was expected of us, we gradually fell into the swing of things. We discovered that the course had much to offer, but that we could take advantage of our opportunities only by hard work and cooperation both among ourselves and with the faculty

Because of our large number it was necessary to divide the group into two sections. This, of course meant that we could not be so closely bound together as we desired. However we have had occasion to work together in inter-class sports and the Wohler Association activities which included monthly meetings, the spring dance and the annual banquet.

In a sense we are pioneers at Pratt, since ours is the first class to enter the Chemical Course under the three-year plan. The eyes of our instructors and the industry as a whole are upon us to test the success of this new arrangement. It is up to us to prove its worth!

INDUSTRIAL ELECTRICAL ENGINEERING I

It was the 12th of September when the first class to enter under the Institute's new three-year plan began making its appearance for our 'Great Adventure.'

The third week of the year found each individual at his place as a cog in the class, and the wheel of cooperation began turning with perfect rhythm. Some took part in sports, others in clubs, and still others in the class publication. Yet, though each had a different extra-curricular interest, there was one thing in common—a sincere desire to succeed. The pass word seemed to be Success Is Born of Resolution.

The class is represented in the 'Electrical Echo' and in the A. I. E. E. In interclass sports, the group has been well represented, and though defeated, it feels proud of its accomplishment and hopes to win a championship within the near future. As an example of its initiative we have the newly-formed radio club which was originated by members of this class.

We the class of 36 cannot help but acknowledge our debt to the instructors, with whom we have enjoyed an intimacy which we will cherish long after we have left Pratt. It is their genial kindness and cordial understanding that has made Pratt more than an institute of high education.

INDUSTRIAL MECHANICAL ENGINEERING I

Early in September of 1933 the Mechanical Engineering Class of '36 stepped into a new realm of education. With several more members to enter a few days later the class began to adjust itself to the new surroundings, study, and associates. Rallies, smokers, and the like were held in order to further acquaint the members of the class with instructors, second-year men, and one another

A few weeks sufficed for the striking up of acquaintances, and after these formalities had been completed, the election of class officers was held. Because we were unused to the procedure of class activities, we welcomed the advice and aid of our Course Supervisor and second-year brothers of the engineering fraternity. Those men elected to office have served well and faithfully so as a class we thank them for that service.

The blue and white M'' expresses the interest taken in athletics, for despite the large numbers of commuters, sports were well supported. Soccer basketball, swimming bowling and baseball teams were organized to participate in the inter-class contests. Generally speaking the respective seasons may be said to have been very successful.

SCHOOL OF FINE AND APPLIED ARTS

Never has there been as keen an appreciation for specialized art training of the Pratt Institute quality and intensity as is evidenced this school year. The serious attitude of the entire student body reflects wholesomely the economic seriousness of the times. While it has been possible this year to accommodate over 700 students, a new enrollment maximum, nevertheless a great many additional worthy candidates had to be refused.

When the anticipated up-swing to prosperity reaches a marked acceleration we will find hand in hand with its progress Art functioning more than ever before. This will be manifested in its many phases, including industrial production, marketing advertising and selling construction both large and small, and increased educational opportunities. The already practical courses of the Art School have been carefully revised in anticipation of this new expanded call for art trained people. Specialists in the newer fields of art opportunities, such as industrial designing packaging and sales devising have joined our staff within the last two years.

The quickening of the functional value the true test of all Pratt Institute courses, is already visible in the placement of recent graduates in these latest art endeavors. A Placement Bureau has been organized that the professional art opportunity and the graduate may meet.

The Art School faces the immediate future with courage and confidence in the belief that Art will more definitely than ever be a vital part of this industrial and commercial epoch and thus interpret and express it more truly

A D V E R T I S I N G D E S I G N I I I

To everyone at one time or another there comes the need for contemplation and reflection. The termination of our three years at Pratt is such an occasion, most of us look back on these years as a profound experience. They came to us at a time when life's mysteries seemed most disturbing. There was a need for something much bigger than ourselves to lighten the burden. It seems but yesterday that we entered the Art School feeling completely lost. A few lucky individuals seemed to have friends, but the majority glanced furtively around for some one to be miserable with. Suddenly emerged that feeling of friendliness, of brotherliness. This friendly contact has developed until now we find ourselves as one big family a class not fostering a selfish spirit, petty idiosyncrasies, or rebellious natures.

We have participated roundly in all social, athletic, and art activities and we are ready to leave these halls of learning knowing that we have given as well as received the very best.

In leaving 'We' as a class express the deepest appreciation to the executive staff and faculty for the assistance given to us and we render heartfelt thanks to the individual instructors who have come in direct contact with us for their untiring efforts to give us their all. As we cross the outgoing threshold of the Institute, we realize that the personalities, the faces we knew, and the good times that we experienced will forever serve to brighten and stimulate us as we tread the path of life.

The athlete from Massachusetts with a weakness for dark eyes.

A R C H I T E C T U R E I I I

Just three years ago those wise and far-sighted gentlemen, the editors of Pratttonia, saw fit to record in the annals of history through their own medium, the fact that at last something had been done to advance the hitherto deplorable standards of architecture in this great country of ours. To-day those men stand justified, for to-day Pratt Institute graduates the class for which the world of art has breathlessly waited.

Innumerable tasks we have had during the past three years and in all of them we have more than justified the ably-placed expectations of Johnny Q Public, et al., but now that our debut is at hand we find our hardest task still before us, i. e., to take pen in hand and record in so small a space all that has gone into the fashioning of this class of super-architects.

May we lapse for a moment into a most unbecoming attitude of humility and doff our hats, editorially speaking to our instructors, and acknowledge an undying gratitude to them for trying to make plain to us just what it was all about. Also may we express our sympathy as we gaze back and realize what we were three years ago, and are, no doubt, to a certain extent to-day though we hope to an appreciably lesser degree.

The marks have just been posted and we are forced, from a hideous sense of truthfulness, to admit that the first paragraphs of his may contain one or two slight exaggerations. The Class of 1934 leaves Pratt to become just a crew of struggling young architects, but we do so with the sincere conviction that we have the soundest possible background.

ARCHITECTURAL CONSTRUCTION II

In the fall of '32, we the construction class, started a new phase of our education, designed to fit us for a successful participation in the profession of Architecture. Under the guidance of Mr Pope, we worked—and how we worked! We bent over our boards, and drew lines—thousands of lines. At first, they formed just a maze of hazy ideas, but soon they shaped themselves into doors, windows, floor plans, and finally—complete houses. Our lines began to mean something, and so did Architecture.

This year as a result of the efforts of Mr Price and Mr Munson, we have learned to observe, appreciate, and detail—good construction. Despite the condition of the building industry there was no depression in our classrooms. Everyone was busy detailing entrances, stairs, designing beams, trusses and footings; and enjoying it, too. We've gained enough confidence to build anything from a closet to another Empire State Building (?)

The series of lectures by men prominent in the various divisions of Architecture and our trips to various buildings—some under construction, others completed—have helped close the gap between the drawing board and actual construction.

In the social and athletic world we are proud of our record of cooperation with 'The Architects,' and especially to share in the Soccer Championship and other achievements.

In closing, the class regrets the loss of one of its most esteemed members of the faculty, Mr Finlayson, instructor in Mechanical Equipment.

"It is time," the walrus said, 'to think of many things—"

Graduation marks the end of another chapter in our lives, one that will be well remembered for its lasting friendships as well as for the knowledge gained, and (hopefully) the precedent of many chapters in which our ambitions will be realized.

Our reputation for deportment and behavior in general may not be all that it could be, but, with a gentle (?) shove every now and then we have managed to put out some work that we may well be proud of—work that we hope will start us on our way to success.

We will miss the fevered rush of Miss Tucker's class, the long careful hours spent on Miss Lincoln's work (working for the Harpers Bazaar no less) and rousing arguments over the pose in Life class. We will soon be parted from our friends, and all those enjoyable activities such as the dances and basketball games.

So the Fashion Illustration 3 class leaves the halls of Pratt to go its many ways. We will soon be on our way to doing things, with many regrets that school days are definitely over for most of us.

It is known that the higher one goes, the rarer the atmosphere and the clearer the air. This being conducive to better thinking and working we of the fifth floor take pride in our achievements. To a stranger the fifth floor may seem a bit austere and uninviting but to one who knows, it is the direct antithesis. Bridge games, chess, checkers, and ping pong help us while away the noon hour, and a friendly spirit pervades throughout the group.

But all is not play—we too have our serious moments. Numerous awards have been made to students as results of various competitions held within and without the school. In our three years here we have learned the value of co-operation among ourselves and with our instructors. Practically pioneers in the field of Industrial Design, we feel that we have attained at least a working knowledge of what lies ahead of us when we enter upon our professional careers. The world at large is just awakening to the importance of the Industrial Designer and we realize the potentialities the future holds for us.

To the Industrial Design Classes of the future, we leave the hope that their three years here will be as profitable as ours have been, both socially and scholastically.

Illustration 3X is precisely what the doctor ordered! Since its injection into the curriculum of Pratt, 3X has been one of the most potent stimulants in the Institute. Nursed through its first year infancy of inexperience, and doctored with parental supervision during the second year of adolescent enlightenment and encouragement, 3X has matured into the adulthood of capability and responsibility.

The first year found the class, one of the largest ever to enter the school; but despite this handicap, marked progress resulted, and the close of the year found the class possessed of a favorable reputation among both students and faculty. Illustration 3X is composed of about one-half the original group—the rest having pursued the Teacher-Training course.

Athletically and scholastically, 3X is unequalled, having at least one member on every team in the school, and represented in three official positions in the Artsmen and Paletteers. This "school spirit," in addition to original and well-presented work, is responsible for such remarks as "nice group to work with," "corking good workers," "sorry to lose them next year," etc., which have actually been overheard as the faculty characteristically implied them to the group.

In all due respect to past graduates, 3X feels that with the three years training behind it, it is qualified to regard itself as the most outstanding group ever to leave the school, and is honored to know that Pratt feels it is sending out its Greatest Advertisement in many years.

INTERIOR DECORATION III

After three years spent in Pratt Institute we feel that there is no sense in waiting for Opportunity to knock. We'll just go up the road and escort it back. While older and wiser people shake their heads sadly and prate of the depression, we make our exit from Pratt with no misgivings whatsoever

We have been hearing about the 'new deal' for some three or four years. Now it is our turn, and life has shuffled the cards and is giving us a wonderful new deal, and it is up to us to play those cards wisely and win that stake that means security stability and our future happiness.

The multitudes bow before youthful ambition, and this next stop in our life will be a veritable proof of what we are made. We are cast into this stream of life to sink or swim, and he who is not afraid of work, will surely attain the ultimate goal that is so coveted. This is a true test for endurance ability and good sportsmanship.

Confidence is the keynote to success. Without it, ability is a partial cripple. To have confidence is to look the world straight in the eye and accept its challenge to conquer. To have the name of Pratt Institute behind us should inspire that confidence which is so vital to our future.

After checking in so many times, we are at last checking out and may we carry on to lasting success. Here's to us.

ART

PICTORIAL ILLUSTRATION III

There is much to view in the retrospection of our three years, happy and resplendent years at Pratt, but each year has been so chuck full of events that, sad to say we can hardly begin to mention them here.

Atmosphere swallows the sea-gull on its flight toward the sea in the same way as the thoughts and innumerable incidents vanish from one's mind, as time gradually moves on its steady course. But there are outstanding events which remain in a distinct view in the all-too-misty mind. Of these, our class seems to have been blessed with many for such incidents, as the winning of the Walter Scott Perry scholarship by a class-mate the winning of the latest Summer's Exhibit by another as well as a good percentage of us obtaining other prizes in the same exhibit, and former ones. Too we merited the name of fine water colorists when we were well represented in the American Watercolor Exhibition. These are but a few of the countless events that we are proud to acknowledge. All these have adhered to the windows of the mind—hence they will not easily be forgotten. In spite of active rivalry genuine and lasting friendship exists among ourselves, so that when we look through one's mind's windows in the years to come, it will undoubtedly be together. In the meantime, we are hoping that the future will bring as happy pictures to look back upon as those that we have acquired so recently here at Pratt Institute.

TEACHER TRAINING III

This is June and in a few days the book will close upon the last pages of our art education at Pratt. It has come rather suddenly—this closing—and at its first realization we are a bit saddened. Justly too do we find ourselves this way—for these last three years have been very pleasant. They come back in kaleidoscopic impressions, the vibrant, powerful metropolis throbbing with a half wild, exotic joy the warm, radiant glow that follows hard work; spring days in a park, moist earth, the smell of green leaves, wind-blown hair the slow mastery of new mediums, the feeling of paint under the brush, the thrill of a sweeping line, the flame of dashing color then voices of friends, laughter, songs, unspoken words.

We are now on the point of departure. And at a second realization we are rather happy—not happy to leave our friends or these joyous experiences—but rather glad in the anticipation of what is to come. How our hopes, ideals and very characters will stand the strain of the disillusion ahead, the seeming inanity of our most sincere efforts, will be told in time. But behind us there is the inseparable security of our experiences here—experiences from which we have grown to know that despite future privations, tomorrow too, will bring a host of friends, similar to our classmates—humble, sincere, generous and kind.

With the fall of 1933, a new class in Advertising Design entered Pratt Institute; a group determined to uphold the traditions of its predecessors, eager to begin their work of the second year. Though our class was comprised of faces old and new it was within the course of a few weeks that we were intimate associates; classmates in work and spirit. Very soon we adapted ourselves to the pleasant routine of our studies, and the knowledge gathered during our first year, easily prepared us for the more practical problems of the present. Through the contacts of our instructor, Mr Longyear certain members of our class proved outstanding in producing winning designs, which were purchased by local advertising merchants. A group of our best package designs of the term were on display at the Hotel Pennsylvania. Toward the close of the first term we were pleased to note a decided progress in our work. Our endeavors seemed to reward us with a greater ease in the handling of the different mediums.

Our class party will forever remain in our memories as an unforgettable evening of delight. Various members of the class were prominent in Soccer Basketball, Swimming and Fencing. Literary members attained a place on the Prattonia Board.

With the close of our second year we look back again at our progress, our contacts, and our joys of school life, and once more give thought to those whose sacrifices have enabled us to be here. May we express our heartiest thanks to them, to our instructors old and new and to our various school officials, we hope our efforts have made us worthy of their cooperation. Our sincerest acknowledgment of appreciation to all—may we in years to come prove worthy of our alma mater—Pratt Institute.

Last September there gathered at Pratt's gates a rather small group to help carry on the honorable record of the Architectural Department. A group gathered from various parts of the country with a common interest and that to learn something about the mysteries of Architecture.

At first we had some trouble getting under way but under the watchful and experienced eye of our instructors we finally began to absorb a little knowledge about the mystifying subjects of Graphics and Mechanics.

In athletics we have been well represented in soccer, basketball, bowling and baseball. Although no real outstanding athletes, all have had the traditional fighting spirit known of the Architects both in victory and defeat.

As the year nears its end, the various architectural terms and symbols have become a part of our everyday life and don't seem so mysterious as they did the first couple of months. The passing of planes, casting of shadows and drawing of force diagrams are just a part of our everyday work now

As a class we wish to say that, although very young in this great subject of Architecture, we are very glad to have found what we want to take as a life work and the right place to prepare for it.

"Gosh, Reba—and his water colors positively make me weak!"

D E S I G N I

It is the general impression that Design I has taken the first step toward commercial success by realizing the importance of social intercourse. It is attempting to function as a unit. Each member while striving for his own goal, is conscious of the need for cooperation to attain it. Not only in the classroom does this attitude prevail, but also in outside activities.

Under each instructor an attempt is made to achieve the professional attitude. Nevertheless, the spirit of good fellowship prevails. The class feels that the series of Friday afternoon excursions to places of artistic interest is one of the most profitable features of the course. From these has been gained a knowledge of the practical application of both design and decoration.

In an effort to further the friendly feeling there have been several class gatherings. These have succeeded in bringing the members closer together

Design I is endeavoring to increase this spirit of cooperation and fellowship, and to be worthy of its position at Pratt. Such a beginning is a great asset. If the rest of the journey proves as successful, without a doubt it will result in a happy landing for each individual.

F A S H I O N I L L U S T R A T I O N I I

Returning to Pratt in September after vacationing in diverse places, the second year Fashion Illustration class started its first year of specialized training

We began at once to learn of the mysteries of the world of fashion. Slim, elegant figures, chic clothes, new accessories and novel ideas were impressed upon our minds. The names of Schiaparelli, Agnes, and Revillon Freres now roll glibly off our tongues, and we smile knowingly whenever one mentions Grafstrom, Ericson, Luza, and other famous fashion artists. Of course we aspire to their greatness, but not at the cost of copying their technique.

We have been sent out on expeditions to the realms of smartness, and have peered eagerly into shop-windows displaying the newest gowns and hats.

We thank the third-year class with whom we work part of the time for the inspiration which we have gained from them. We are very grateful to them.

Our class works in complete harmony. We are justly proud of our progress in fashion work this far and know without doubt, that it will not cease.

To describe our class as a "conglomeration" may be bestowing a rather doubtful compliment, so let us say that our Illustration IA has variety among its other qualities and characteristics. We could be described as a noisy "bunch" with serious intent, in spite of any outward appearance, and as having a generous sprinkling of talent, a feeling of unity a mixture of nationalities, accents and brogues from the northern staccato to the southern drawl, and appreciation of the opportunities offered at Pratt, and a not-to-be-under-rated sense of humor without which a full enjoyment of life would be impossible, and success disappointingly tasteless.

The matter of becoming adjusted to new environment, routine and people offered no serious difficulties. We out-of-towners will eventually be able to discard our subway and city maps, and may even be able to direct others with a little inward satisfaction and outward nonchalance. The word "routine" smacks of monotony but let us assure you that boredom has found no place in our round of museum wanderings and the continual introduction to new and interesting problems. We sincerely enjoy the association with our instructors, whose experience and understanding of the art field enable them to guide us through a carefully chosen curriculum with a foresight that we will probably not be able to appreciate fully until we have made our entrance into the professional field.

Although the course is intensive in nature, we can find time to enter into enough social and recreational activities to spice our "around the week cycle." In the field of sports we are represented in basketball by Cohen, and our swimming team is composed of Hoffman, Curtis, Corson and Griskenas.

I L L U S T R A T I O N I B

Arriving like green apples, we, illustrators of I B, are in the process of slowly ripening into what we ultimately hope to have the temerity to call artists. To our instructors we express our deepest appreciation for their friendly and encouraging guidance. We owe much to them in our advancement and success.

We are in reality a tiny community thrown together by the hand of fate, and as such, have evolved into a happy rollicking family of fellow artisans. In truth, the fact that we hail from different sections of the country only lends added interest to the many new-found friendships.

As in all classes, we do not lack the comedy touch, for we are blessed with the usual assortment of class wits, crooners and imitators. On the other hand, there is little scarcity of talent, both artistic and physical. In the former we have three scholarship members and in the latter we find three of our boys on the varsity basketball squad and several others on the class team. As to the social whirl, suffice it to say that with a mixed class of rare beauties and young gallants, we have had our share.

Comparable to a train laden with potential talent, we have spent this initial year testing and improving our equipment, eliminating the many flaws and making certain that all is in order for the journey ahead that will lead to the shining beacon of success.

Whereupon this signalman hangs his lantern on the wall—wishing good luck to train, trainsmen and to all concerned.

I L L U S T R A T I O N I C

A whole year has sped past and we are now full-fledged Pratt women. And what changes this year has made!

From a group of doubtful artists we have grown into a more confident class of ambitious students. Within the first week that conspicuous and strange feeling had disappeared and we were hustling from room to room, just missing the elevator and dropping our paraphernalia as much as the oldest of seniors.

We are a very friendly class of females, in fact, according to some teachers, too friendly. Our reputation is above average in the conversational field. We like to visit other classes and we like to linger and chat in the halls but then what class doesn't?

Pratt has done a great deal for us in a year. And who knows, in two more years we may even be good artists! Now we have a worthy aim in view. These months have been spent in giving our artistic senses their first nourishment. It is from this nourishment we hope to grow into capable artists.

During this year we have gained poise and confidence. We can break up any kind of a space you may suggest, we can draw our still life with eyes closed (sometimes our work looks as if we tried it) we can copy our neighbors. History of Art notes as well as any first year students, we can make a woman wrestler out of the daintiest of life models. O there's no end to our accomplishments.

In all sincerity, though, Illustration 1-C wants to thank its Alma Mater teachers, and fellow students for a full year of well balanced work and recreation. We do love our work and we hope that our work shows it.

I L L U S T R A T I O N I D

We the class of Illustration ID set sail one balmy September day on the good ship "Adventure" to embark on a three-year cruise through the portals of Pratt Institute, inspired with the ambition to some day change the name of our "Ship" from "Adventure" to that of "Success."

We are a class comprised entirely of females, and therefore possessing all the qualities attributed to the weaker sex, oftentimes cause our instructors much discomfort. But, in spite of our faults, there are decided points in our favor. A good showing of talent is present among the members of our group.

The first lap of our journey has been most enjoyable and interesting except for a bit of heavy seas in the month of February which marooned some of our class for a few days on the flats of Long Island and thereabouts. A winter which none of us will forget.

In our short stay here we have captured the true Pratt spirit. We appreciate only too well the good counsel which Mr. Boudreau gave us when he advised us to work diligently. We recognize Pratt as a place in which to learn business ethics, and to practice them in our daily work. We now feel reasonably secure that when the time for docking our ship arrives, we will not flounder around in hazardous waters, but will make a perfect landing in our home port.

It is with great pleasure that we are able to speak of Pratt Institute as our Alma Mater. Everyone of us is proud to be here. We hope that in the two years to come we may prove a great credit; may carry on her high standards, and remain as loyal to her as she has been to us.

I L L U S T R A T I O N I X

It can hardly be said that our class has made any history during the short time which we have been studying at Pratt. We as a class cannot boast of a glamorous past, but we are all looking forward to a future which we hope will reveal some of our hidden talents.

Our class contains many serious minded students, although we seem to be characteristic of the IX classes in that we have gained the reputation of being a rather noisy group.

We have students representing several states, including Connecticut, New Jersey, Pennsylvania, Louisiana, and, of course, New York.

A few of our classmates have already broken into the commercial field and are building up a promising future for themselves. As far as ability is concerned, it is divided quite evenly among our various classes. Our class does actually seem to have some talent, for every once in a while an instructor announces that some unsuspecting student has revealed some ability which had formerly been hidden.

It might be well to leave the subject of ability up to our instructors, for they can determine where our talent lies.

And so we continue our march through Pratt, hoping that we may add something to the good name of the school.

I L L U S T R A T I O N I I X

It is said that all X classes have the reputation of being rather unruly and otherwise disturbing. It seems that we the Illustration 2X class, have so far been more or less true, unfortunately to this undesirable tradition. We feel, however that if this tradition is going to be shattered, as it needs be, we are the class that will do it. In the year and a half that remains of our training at Pratt we shall strive to attain the honor of doing so. Our class, a characteristically happy-go-lucky one, has several prominent students. Their abundance of enthusiasm is serving to the rest as an admirable example of excellent work.

In spite of a few trying times, we are really enjoying our stay at Pratt. With the aid of a few students endowed with a remarkable sense of humor, we expect to have a greater time in the eighteen months to come.

We are really sorry to lose some of our first year instructors, who deserve much credit in helping us to adjust ourselves to our new surroundings. The end of our year meant the end of Mr Petersen's philosophic advice. With a clear cut foundation of design we are now furthering our "design senses" under the tutelage of Miss Tucker. Our class promises to do exceptional work in life drawing according to Mr Ajootian, whose analytical criticisms are proving to be extremely beneficial. Ultimately, we are all looking forward, confident that we will be successful.

I N D U S T R I A L D E S I G N I I

When we, the future Industrial Designers, returned to Pratt for our second year of study, we found a great lonely space that had been occupied by the other half of our class who turned Interior Decorators. The daily contacts and outside interests of our first had served to weld us together in a most surprising fashion and so when we returned and fully realized that half our group were gone, things just didn't seem right, somehow.

In addition, we were placed in daily contact with the third year Industrial Designers. At first there was a bit of a tendency to avoid each other but gradually the individuals composing both classes became friendly and found a group, congenial and mutually benefiting, that, however, did not submerge the individuality of either class.

This year has been easy in some ways and more difficult in others. We returned with a feeling that we belonged and that we knew the ropes, but we soon found out that the daily problems demanded as much painstaking effort and originality as the preceding year.

We have buckled down to a work that we really enjoy with the realization ever in our minds that we have chosen our life work. We have gained a new sincerity, a new grip on life, a more adult understanding of what our work means to us and, best of all, an earnest desire to work as hard as possible in order to reach the heights.

To write a synopsis of the life of the Interior Decoration class during the past year would be to write a story of joys and sorrows, passion and tranquility likes and dislikes, and, above all, unbounded happiness and good-fellowship in a group of people so closely bound to one another as to form a common unit unbroken even by the division of the first year Design into second year Interior and Industrial. Such is Interior II, 1935. We are happy together and we find each one, though truly individual in himself, a necessary part of the whole.

The change from first to second year brought, of course a change in our work—a change perhaps, a little too sudden and great for us to grasp completely at once, but with attention to business and a serious desire to get along we are beginning to see things in a professional light. We are beginning to see just how our jobs are cut out for us and to find joy in, or to regret our choice of profession.

What the future will hold for us we can see in the problems of the senior class. How we will attack and do them we can only determine for ourselves. Where we will find ourselves a year from today we can only guess. For material reward from our efforts we can only hope. One thing in the future we do know—that we shall possess memories, fond memories, not only of individual dear to us, but of a happy fellowship of people a group of friends who stick together a class known currently as Interior Two.

PICTORIAL ILLUSTRATION II

Ever since the day of its birth, our class has been decidedly not of the common run. In our first year we earned the title of "The Noisiest Class." Meant to be derogative, this title serves instead as a compliment, for it is our honest opinion that we are not destructively uproarious but filled with unquenchable enthusiasm. May we, as a group or as individuals, never lose this attribute, but lose ourselves in it.

The class members have shown themselves in two years time to be individualistic in their manner of working, nearly everyone being original in style. This quality speaks well for the class.

Fast friendships have been formed, and the class, made up, as it is, of contrasting personalities, representing every social stratum from many parts of the country, of various races and creeds, manages to get along well with one another. Our class social activities have been nil. This is due to so many of the members living at a considerable distance from the school and each other.

Our President, Richard Geraigery. Vice-president, Harold Capossela, and Secretary Jane Raudenbush, are well liked and never intrusive.

Our individualism and self-assertion is in opposition to the general pessimism and fear of our pre-Pratt depression years, for in common with the youth of our generation, we intend to enjoy life in spite of hard times, in spite of the toil ahead, and to live life to the full while we may. It is not a spiteful, meaningless frivolity which marks our class, so let us be remembered.

TEACHER-TRAINING IIA

What a glorious, ambitious and interesting year this second one of ours has been! Little did we know what this year at Pratt could mean to us.

The personnel of the class has somewhat been changed. Many of our classmates had found that they could fare more to their liking and manipulate their various talents in more specific fields of art. The size of the class has decreased, but the spirit and comradeship has always prevailed in all of our undertakings.

Psychology has been our mainstay during the term, checking us up on our various activities. We have tried our dramatic skill in more ways than one, and discovered many hitherto unknown facts about the Reformation, displayed our athletic ability tested our advertising achievements as well as completed a trip from New York to California under the able supervision of Mr Roy. Many interesting hours have we spent teaching youngsters in the Saturday morning classes as well as the Museum. Our program was brimming over and work was plentiful, however we found time to relax, and amusement was amply supplied at our parties and teas.

The trials and tribulations were many yet, how soon the joys and sorrows of another year have passed away. We are now on the threshold of our Senior year the future looks bright but untried! We aim to carry on as unflatteringly as we have in the past. To be worthy of our Alma Mater is our desire to teach is our aim!

CHORUS

(Apologies to Gilbert and Sullivan)
Comes a train of teachers-in-training
From artistic trammels not quite free,
And we wonder, how we wonder;
We wonder how we wonder
What our third year at Pratt will be.
What our third year at Pratt will be.

Will it bring us lots more leisure,
Gladness set to song?
Will it be a world of pleasure,
To last the whole term long?
Will our palettes, paints and brushes
Serve us as loyally
Or will academic subjects
Crowd them out miserably?
Or will academic subjects
Crowd them out miserably?

Teachers to be we eighteen and over
From artistic trammels not quite free;
And we wonder how we wonder
We wonder how we wonder
If the next Class 2B
Will be as merry as merry as we.

SCHOOL OF
HOUSEHOLD
SCIENCE & ARTS

SCHOOL OF HOUSEHOLD SCIENCE AND ARTS

The founder Charles Pratt, specified in the charter of the Institute that the work of the School of Household Science and Arts should center around food, clothing and homemaking. He knew full well the necessity at all times of a thorough understanding of the fundamentals of living. Whereas the approach, technique and processes might and would differ as the years went by, yet the fundamentals would always remain. His vision was prophetic, for the School of Household Science and Arts is functioning today along these same lines, and the need of this work is far greater today than when the Institute was founded, for during this time the whole economic, social and political status of women has changed.

While it is true that the approach, technique and processes have changed with the years, we find the emphasis today is for specific training along the definite lines of dietitians, cafeteria and tea room managers, costume designers and dress-makers, as well as along the general lines of homemaking. Through all the years, the function of the School has been to present a balanced, intensive program of head, heart and hand—a plan which differentiates Pratt Institute from all other institutions—whereby the students absorb the ideals that should make all education worth while. By means of the intensive courses a thorough, practical training is obtained in half the time of the usual college course and the earning power is equally enhanced.

The statement above is largely taken from the foreword of our school catalogue. To it might be added the following footnote as applying particularly to the disturbed economic conditions prevailing today. People must be fed, clothed and housed now as always. It is worthy of note that occupations based on these fundamentals have weathered the economic storms more successfully than all others and it is reflected in the increased enrollment of the school, 45% of those who have had some training beyond the high school of which 18% are college graduates or those who have had one or more years of college training. It has also greatly facilitated the placing of graduates after they have had our training.

SENIOR COSTUME DESIGN

Our memories of Pratt Institute will always be the fondest. Aside from the fact that we have learned a great deal about designing here the Institute has for us the additional value of being the starting point of many friendships. There never was a better combination of work and fun! Instructors have been not only teachers, but friends, and students, to each other have been not only classmates, but 'pals'!

This year the annual Abraham & Straus fashion show was conducted under the supervision of a few students, with able advice and assistance from our instructors. The resulting dresses were not bad in construction, and rather attractive in design.

One of our greatest achievements was the winning of a prize in a national design contest sponsored by the William Openhym & Sons velvet manufacturing concern.

This year witnessed a new experiment. Each student spent two weeks of school time helping at the workroom of a New York designer. We were thus given an opportunity to observe some of the business methods used in modern style creation.

Now we all look forward with characteristic optimism and egotism to our contact with the cruel, cold business world. But we're sure that each of our varied personalities and talents will find a suitable niche in the still more varied types of work there is to be done.

This business of reviewing one's class history even in the modern and sophisticated year of 1934, is apt to be a sentimental sort of affair punctuated with gentle sobs and whimsical references to the dear, dead days, times of youthful eagerness and so on, ad nauseam. As a group, we deplore this saccharine tendency and deem our class history worthy of a more dignified treatment. Resolved, therefore to be very businesslike and systematic in our last statement as a class, we have employed the methods of inventory taking taught us by our worthy teachers to check up on our two years spent as students of Pratt Institute.

After taking stock, we find listed as definite advantages, the following:

1. An excellent training in the field of Dietetics, a new profession but already a leading one.
"The above stock on hand was gained mainly through the Herculean labors of our excellent faculty"
2. A serious and responsible attitude toward the business of living.
"Serious without being grim, as the faculty can testify having seen us in our lighter moments."
3. An interesting stimulating and lovable group of comrades.
"This is to some of us the most valuable of our numerous acquisitions."

Having duly listed our stock on hand with allowances for ninety two individual variations, we look forward to the future, not through rose-colored glasses, as did our predecessors, but with a clear visualization of the chaotic conditions existing in the world today, and an eager desire to set things right. Ave Atque Vale! Goodbye Pratt! Hello World!

It may be said without hesitancy that every member of the Dressmaking class is well pleased with herself for having chosen Pratt Institute as her Alma Mater. Our education at Pratt has given each one of us a goal. Times have changed. While the world around us has been talking about and struggling through depression, modern youth has been thinking of a purposeful education, created to solve it. Thus——

In September 1933 some twenty girls exhibited their abilities as potential dressmakers by making an apron. Although to some of us it seemed more difficult than to others, we all stayed for the course. We have thoroughly enjoyed our work with our intelligent and well-trained dressmaking instructors, Mrs. McKeon and Miss Clark, who have guided us through all our problems. Embroidery, under the able Miss Govers, has acquainted us with extremely fine handwork. Miss Duntz, our Design instructor has shown us the fundamentals of sketching and by field trips to the museums, has taught us to appreciate a more aesthetic type of art and historic costume.

As we venture forth into the cold business world, we remember the maxim we've been practising successfully throughout the course—"If at first you don't succeed—try, try again."

On that eventful day of October 2, 1933 twenty five girls wandered into Pratt to begin their one-year course in Homemaking. Few of us knew others in the class on that day but within a short time many friendships began which, no doubt, will continue far into the future.

You must excuse us, but on looking through the list of our social activities, we find that it is rather abbreviated. However we managed to cease our domestic attempts to show our appreciation to the faculty in the form of a luncheon and bridge, and later to demonstrate to our Mothers the cooking benefits derived from Pratt.

During the course of the year we have made several group excursions to various points of interest in New York City and Brooklyn, which were not only educational but very enjoyable. These trips included Lewis & Conger's, where we enjoyed an excellent display of modern kitchens, the Whitney Museum in Greenwich Village; two private apartments, Sloan's, where we were especially interested in the House of Years, and also several trips to the Brooklyn Museum.

Although this one year here at Pratt has been very short, we all agree and feel that not only the friendships begun here, but also the training in Homemaking will be of great value to us all in the years to come.

INSTITUTIONAL MANAGEMENT

Because of the nature of instruction and work in the Institutional Management department of Pratt Institute, perhaps a warmer spirit of happy friendship prevails here than in other parts of the school. After all we bake our cakes and pies together and much the same contented atmosphere surrounds us here as settled in the great, old-fashioned kitchen on 'baking day.'

We 'institutionals,' have been taught, from the mixing bowl up, the complex factors which, taken in their entirety make for a wholesome, well-run organization for the preparation and service of the most important, most interesting and most welcome necessity of man—FOOD.

The most complicated problems, those problems which are taken so for granted by the consumers, are simplified for us by our instructors. It has indeed been a pleasure to work with them.

We must admit to something like a 'busman's holiday' when we ventured into the social life of Pratt. The gay spirits of the department never palled!

And now—to the members of the faculty to whom we are deeply indebted and to all our friends, we bid adieu. The memories we take with us from Pratt are dear to us and we thank you for your part in them. We hope our new life will afford us many opportunities in which we may see you all again.

JUNIORS

JUNIOR COSTUME DESIGN

As the wheel of time turns we find ourselves at the half-way point in our education. Many of us have had one year at Pratt, in which we learned to appreciate all the fine things that this Institution stands for: as well as the art of Dressmaking. Those of our class who were new this year entered into the spirit with which we all look forward to our senior and last year. The courtesy with which the Senior Costume Design students welcomed the incoming Juniors was deeply appreciated and we, the Junior Class, wish to extend that same courtesy to the new students next year.

The year has brought forth many interesting social events. the Home Economics Club Tea, Artisan's Club meetings, the Alumni party and numerous dances.

We were very fortunate in having the opportunity to hear two speakers who figure prominently in the Fashion World as leading American designers, Miss Miriam Boslogue and Miss Elizabeth Hawes.

Last fall the Abraham and Straus Fashion Show gave the seniors a chance to create and display gowns of their own design. Although the Juniors had no active part in this show they were interested and enthusiastic about it. On April 4th, the Fashion Show of the year was held at Wanamakers. Senior and Junior Costume Design classes, also Dressmaking students were eligible. The work in preparing for the show was well repaid by the experience and fun of modeling one's own creation.

There were but a few busy weeks between the Wanamaker Show and the termination of the school year. During this time all ends were tied and preparations for the summer were made. Some will work, but many will enjoy a good vacation. Next fall we will meet again to continue our work as Senior Costume Design students.

J U N I O R D I E T E T I C S

The year started with a tea given us by the faculty. At this affair we had our first opportunity to really meet all of the faculty, who have done their best to aid us in every way.

The next social event on our calendar was the Senior tea. This was also a great success and succeeded in breaking any ice that might have still lingered.

After this the class proclaimed a real unit in the school and organized into an active body by electing officers. With our class now organized, the year settled in a steady routine.

The Volley Ball team, with Natalie Goldwasser as captain, won the championship, defeating the team of the Senior Dietitians and the Senior Costume Designers by 40 to 26 and the second year Art Students by 45 to 30.

Our Hockey team, with Julia Clarke as captain and Greta Johnson as assistant captain, didn't fare so well. They lost gallantly to the Junior Costume Designers and the Institutional Management students' team to the score of 2 to 0.

Twenty Junior Dietitians were awarded blue chevrons for gymnasium work and Aileen Chadwick received the only red chevron given in the Household Science School.

Have you heard about our newspaper? We are having one to help us get better acquainted.

We plan to have our Junior Prom sometime in April and our tea for the Seniors, we expect to hold early in March.

After these events our social position will be really established and we will go into our Senior year with confidence.

SCHOOL OF
LIBRARY
SCIENCE

THE LIBRARY AND SCHOOL OF LIBRARY SCIENCE

The Pratt Institute Free Library in the midst of the open park area on the west side of Ryerson Street, is, in a sense Pratt Institute at a focal point. With its three-fold function, the Library is to the students and instructors essentially the Library of Pratt Institute, and its activities are addressed to meet all the requirements of the courses offered as far as the literature of the subjects can serve. The Art Reference Room, The Applied Science Reference Room, the Front Reference Room on the second floor are specifically ordered with regard to the reference requirements of the students in the three Schools on the opposite side of the Street.

Moreover the Library is free to the people of Brooklyn, carrying out the purpose of the Founder when it alone was open to the public before the days of municipal libraries. The third element in the Library's organization is the School of Library Science the fourth School of Pratt Institute. To these students of Librarianship the Library is a training ground and laboratory throughout the year. Thus, every interest of Pratt Institute is reflected at the Pratt Institute Free Library the ambition of which is to keep abreast of progressive ways of thinking and doing in the lines of pursuit which Pratt Institute sets forth.

L I B R A R Y S C H O O L

We the class of 1934, have now in reality become Pratt Institute Library School. For years many of us have desired to come to Pratt and through all the years to come we shall cherish and profit by our experience. As our little band merges into the larger body of the alumnae we gain a broader viewpoint and rejoice in the solidarity of the school.

We had hardly hoped in so brief a course to find a number of gracious and significant traditions, but there were. We sensed it first at the alumnae reception where we were subjected to that penetrating but most kindly scrutiny which it shall be our pleasure to bestow on the incoming class. Candlelight at Miss Rathbone's, bookplates at Miss Bucknam's, our tour with Miss Middleditch, and kindnesses of the staff too varied to mention. As for ourselves, although we may have boldly broken some Traditions, we feel we have bravely established others.

Doubtless every class considers its own list of 'Tuesday Tea' guests the most distinguished and stimulating. We are no exception. But we may rightfully claim, and gratefully most intimate acquaintance with Mr Stevens press. We have studied hard, while finding time for library meetings, theatres, operas, miles of art and leisurely moments on the roof. Examinations have been the occasion of much quaking and subsequent great rejoicing. In all our difficulties Miss Holmes has been a very present help. As for the Spring Trip, the only possible comment is "Veni, vidi, vici."

There have been red-letter days on our social calendar despite the burden of work, as the list below gives mute testimony. Here's hoping the following dates bring back fond memories, Prattseyites!

- Sept. 17 The Architects had the honor of starting off with the first 'Howdy Dance.'
- Sept. 24 The Artsmen did a quick 'follow up' with another afternoon dance.
- Oct. 6 The Faculty Reception marked the first evening dance of the school year
- Oct. 10 The Paletteers scored with an afternoon 'double-cut' dance.
- Oct. 13 The Boilermakers represented the S. & T. School with an evening dance.
- Oct. 17 The Artsmen-Paletteer afternoon dance.
- Oct. 27 The Industrial Design School with a Hallowe'en Dance.
- Nov. 2 The Chemicals—evening dance.
- Nov. 10 The Architects—evening dance.
- Nov. 15 The Artsmen will well remember this date—their annual Banquet and—
- Nov. 17 The Glee Club Concert followed by a dance.
- Nov. 22 An afternoon dance given by the combined forces of the Paletteers, Artsmen, and Architects.
- Nov. 24 The Senior Costume Design with something new"—a Roundup Dance.
- Nov. 25 I. E. E. II evening dance.
- Dec. 19 Xmas party, tree, Santy 'n everythin' and dance.
- Jan. 16 New Englanders Club afternoon dance.
- Feb. 23 Senior Dietitians' evening dance.

May 27th—at the Waldorf Astoria Roof Garden—Peter Van Steedan playing—what a night! The seniors, in all their glory indulging in one last splurge under the fond eye of the Faculty—at their own dance that is 'put over' with so much enthusiasm every year—and lives so long in the memories of every lucky participant. A fitting end to the year's work and companionship at Pratt and an event that has become an annual part of the Senior activities. May we add our cheers and fervent hopes that the Senior Promenade continue to add that last sparkling high-light in the years to come.

The Student Council this year has endeavored to promote and encourage all student activities. They have maintained the interest of the students in these activities through a sturdy body of co-operative members who have been anxious to arouse enthusiasm and Pratt spirit throughout the school.

The Council members first became acquainted at an informal social and business meeting at the Women's Club. The President outlined, at that time an ambitious program of new social activities which, he hoped, would be sponsored by the different schools of the Institute.

Later in the season a closed dance for the Council members enabled them to become better acquainted, and an All Pratt dance was planned for early in the Spring to bring together the students of the entire Institute.

Through the efforts of the Council, the method of electing officers to the Prattonia Board has been revised, in order to enable the student body to have more voice in the voting of the Board members.

The Glee Club created four years ago by the Council, was reorganized early in the year and had an outstanding season. Groups of students from neighboring states organized "The New Englanders" and "The New Jersey" Clubs.

It was to everyone's interest that the Council reopened the campaign to raise money for the alumni swimming pool. With the help of a former president, Mr Ellis, a nominal sum of money will be collected by the end of the term.

As is customary the council is sponsoring the Senior Prom and plans are now being developed for this much-cherished annual affair.

A Spring boat ride will bring the duties and accomplishments of a fine Council to a close. They leave behind them a spirit which they hope will instill in the 1935 Council the desire to fulfill plans for the introduction of higher social activities. Sufficient authority presently not granted the Council, has retarded procedure toward these aims. It is their wish that the new Council be granted authority to inaugurate these plans in their program.

Here's success to you!

The Wohler Society has completed another successful school year namely that of nineteen hundred and thirty-three-thirty-four. The society's activities began with a smoker held at the Men's Club, at which the first year students were cordially welcomed into the organization. Numerous other smokers were held throughout the year at which the society had the privilege of hearing several interesting speakers. Technical films frequently supplemented the speakers' talks. These smokers have provided an outlet from the daily routine and have formed the back-bone of the society's activity.

The Wohler Society's annual formal dance, held in April, again proved to be the bright spot of its social season. The dance was followed by a farewell banquet, in May thus bringing the season year to a close.

The Pratt Institute Branch of the American Institute of Electrical Engineers offers an average of two meetings each month for the purpose of presenting student papers and interesting discussions on technical subjects.

Inspection trips to various local points of interest are sponsored by the Branch to allow students to see modern and efficient installations of electrical machinery.

The addition of many new members this year has made the Branch larger than at any previous time in its history.

The school year nineteen thirty-three-thirty-four was one of the most successful in the history of the branch. Enrolled membership this year was the largest in the United States. The branch was honored by visits from many of the most prominent men in the engineering field.

A system of committee organization was utilized in order to keep the activities of the branch along lines of popular interest. Very much interest was shown throughout the year by both members and other students in inspection trips and meetings.

The class of 1936 took an active part in all activities during the year. Their keen interest indicates that they will carry on the progress made by former branches.

The Seventh Science and Technology School Convention, held April eleventh under the direction of the Mechanicals, was one of the finest ever held at the Institute.

The Afternoon Session was devoted to the presentation of technical papers and entertainment, of which the Electrical Minstrel was a high light. Awards were made in the following order for papers: R. Traverson, I. E. E. '36; H. Burr I. M. E. '36; M. Amsterdam, I. Ch. E. '36.

In the evening the first S. & T. Undergraduate Banquet was held in Recreation Hall. The principal guest speaker was Professor Rautenstrauch, and his topic was National Reconstruction.

THE WOMEN'S CLUB

The Women's Club is one of the few places where girls from all three schools meet and get acquainted with each other; there is constant rivalry and friendly friction, especially at noon, when Art Students and Junior Dietitians try to tell Senior Dietitians how to cook. A crowd of girls burst into the kitchen; there is much clanging of pans and bustling about, due to the limited lunch hour. Occasionally a crash summons Elizabeth, who immediately comes and collects nineteen cents for the broken dish. The meals are not always perfectly balanced even those prepared by the Dietitians, as sometimes there are tin cans found in the paper basket, due to the fact that the garbage can has already been filled with them.

The Men's Club is the recreational center for the men of the Institute. Here the students gather after a hard day's study to drive dull cares away with easy relaxation and pleasant pastimes.

The main floor of the Club building has a comfortable, 'clubby' interior adorned with trophies and furnished with restful chairs and lounges. At one's top story is found the deservedly popular P I. Lunch, where, at noon-hour students munch sandwiches in accompaniment to the soft, sometimes hot strains of George Cumming's trickling fingers on the (well-tuned) piano.

Over all presides our genial and sympathetic friend, Mr Wright, who conducts a forum of advice and help to the students with problems and troubles.

Long live the Men's Club!

The members include the Junior and Senior Costume Design students. This year the Club was fortunate in having Mr Harry Marens speak to them. He has done very notable work in the designing of theatrical costumes for dance recitals. He also explained the making of masks, which he uses with his costumes.

The Paletteers have drawn to a close in another successful year. We have sponsored interesting exhibitions and presented several speakers. Our fall and spring banquets were outstandingly successful among older students and an ideal way of introducing the new girls. We followed this up with several afternoon dances, where the "double-cut" feature was popular. At Christmas time the Paletteers dressed 250 dolls for poor children and joined with the Artsmen and Architects in a Christmas party for the school. Before our farewell, we are giving a Shipwreck Dance at night and hope to have the annual boat ride.

In leaving we welcome the new officers and extend our best wishes to the Paletteers of 1935.

A healthy spirit of cooperation in all Artsmen activities has brought about such successful results as are unprecedented in the annals of the organization.

Under the able supervision of Mr. William Longyear the year has been a social triumph. The Artsmen-Paletteer Howdy Dance took the lid off, so to speak; the Howdy Banquet was great, but the Southern Cruise Dance reached the very heights—both financially and socially. At this moment it is proper that we give credit where credit is due. Cornell Hartman's untiring efforts toward decoration, and so forth, was the real reason for our banner year. Hats off to Cornie.

We feel that we have done all in our power to carry out the original ideals during the past year and in leaving we extend a most hearty welcome to the new officers.

The combined Glee Clubs of Pratt Institute the only organization including all the schools in its membership, began its season rather feebly—considering the successes gained. Our membership, though small, was made up of untiring workers, who determined to make the Glee Clubs an important factor in the life of the Institute. Our first was a dance and concert, which was enjoyed by all who attended.

We began the last half of the year with a determination to keep going. After hard, persistent efforts we succeeded in building up our enrollment and as an incentive for this decided to put on the Gilbert and Sullivan operetta, "The Mikado." The outstanding success of this performance may be attributed to the capable directorship of Mr Leroy Tebbs and its able management by Mr Edward Dittmer with the aid of an active committee.

HOME ECONOMICS CLUB

We have this year built and enlarged upon the firm organization presented to us. Every year the work of the club becomes greater and the achievements even better.

The tea for New York High Schools drew a crowd of three hundred students. Miss Edith Barber spoke most interestingly and brought out the fact that the Student Home Economics Club membership was most valuable to a girl intending to enter the business field. Mrs. Gertrude Hoeg the advisor of city school clubs, greeted the girls.

As we belong to the state and to the National Association, the many other well-known and influential members are brought into contact with the lesser ones as we are. These contacts can and will be most valuable to the person desiring acquaintance with business women in every field.

A banquet will be this year's last event.

The New Englanders are sincerely confident about the Club's future success in school activities and also in promoting a unified spirit among the students of the entire institute.

ATHLETIC FOREWORD

The program of Athletics at Pratt Institute contributes much to the quality of life among its students in the way of training and recreation. Intimate personal contacts between members of the various teams, social intercourse afforded by our interesting schedules, are bright spots in the life of the school long to be remembered.

One of the outgrowths of our present economic development is an ever-increasing leisure time for the majority. How best to spend such time has been a vital problem in America for some time. If we consider education in its relation to actual living and not alone in its relation to industrial efficiency it becomes highly important that education should include adequate training for leisure time. Athletics and Physical Education are faced at this point with a very definite opportunity and obligation. Those of you who are graduating this year from the Institute who may have acquired or cultivated a skill and enjoyment in some sport or physical activity have equipped yourselves with a life-long interest which will give a satisfactory solution in part for your leisure time.

Besides the training for leisure time Sportsmanship is another contribution to good citizenship which properly conducted athletics seem in a unique position to bequeath its followers. Sportsmanship must be thought of as an attitude rather than a way of acting. A man who is a gentleman instinctively acts in a sportsmanlike manner even if he does not know all the rules involved in being a gentleman or a sportsman. Consideration for the other fellow's feeling is, therefore, a basic principle in true sportsmanship. If our attitude is right, our actions can readily be trained in the right way.

Sportsmanship has to be learned and practised. Tempers have to be controlled, urges to self-centered conduct have to be submerged and other responses put into action. The player who attains true sportsmanship will be a credit to himself, to his school, to the game and to the community whether his physical skill be great or small.

Must be new business.

ATHLETIC COUNCIL

OFFICERS

E. ZALINSKY	President
M. DELYS	Vice-president
R. CURLEW	Secretary
MR. WRIGHT	Faculty Advisor

Since its beginning in 1922, the Athletic Council has been the leading spirit in promoting larger and finer athletic programs at the Institute. The functions of the Council are to regulate men's interclass sports, to make athletic awards, and to govern general athletics at Pratt.

The Council is composed of representatives from each of the men's classes. Meetings are held regularly and current business is discussed.

Under the capable guidance of the faculty advisors, Mr Wright, Mr Ajootion, and Mr Hostetter the Council has made this a most successful year. Considerable interest was shown in all interclass sports during the year and friendly rivalry rose high. It is our sincerest hope that in the future this Council will carry on and improve interclass athletic conditions even more than it has in the past.

Tell Mother I died for Pratt!

CHEERLEADING

The first call for candidates for assistant Varsity Cheerleaders during the season of 1934 was issued by Varsity Cheerleader Al' Merceir. The call was answered by "Howie" Burr and "Shorty" Lane, both being chosen. Shorty Lane, our peppy little assistant, was unable to continue in the last part of the season.

A pep meeting was held just prior to the opening game, to familiarize the new students with the Pratt cheers. The team was well supported by a very enthusiastic crowd at every game.

Between halves the custom of singing the School Alma Mater was continued. Thanks are extended to the students for their fine support and spirit displayed during the past season.

V A R S I T Y B A S K E T B A L L

With nearly all of last year's squad returning the outlook for a championship team for this year looked very promising. This goal was not quite attained, although spectators sat throughout every game, not knowing what would happen next. It was not at all uncommon to see our star Johnny Reiser get into a mass of tangled players, roll out on his head, then go down the floor and shoot one of his spectacular "left handed" shots. A very difficult thing for a spectator to do was to follow the speedy little Joe Condict around the floor.

The outlook from the beginning of the season showed us that the whole team represented a group of stars from last year with the addition of two other promising players, who have shown some very good playing for their first year, Zeitlin and Cohen.

It is all fitting and deserving that we should take this time and offer our thanks to Charles Butterfield for his services in arranging the games and handling the business of the team. It is also proper that we congratulate Coach McKillop for the completion of another successful season.

Brooklyn College — 30

Pratt — 38

The initial game of the year with Brooklyn College showed the visiting team a fast and aggressive type of playing with our star "Johnny" Reiser leading with high score. The whole Pratt team functioned as one unit, which was able to outplay her opponent.

Springfield — 14

Pratt — 29

This game marked Pratt's second consecutive victory by beating one of our last year's conquerors. Our defeat last year was thus evened up. Pratt's defense worked perfectly. "Johnny" Reiser kept up to his standards with sixteen points. The game brought out a very good player from the new material, and that was "Long Shot" Zeitlin.

Long Island University — 54

Pratt — 26

The larger and more experienced team from Long Island proved our first defeat. The floormanship and passwork far surpassed that of our team. The combination of Kameros and Schwartz, with their "dead" shots, proved our undoing.

Crescent A. C. — 34**Pratt — 23**

The Crescent A. C. basketball squad is one of the best teams in our district and showed the Pratt rooters that with a little more experience Pratt would be the best. The dependable work of the Pratt five formed a good bulwark temporarily but their efforts proved to be of no avail against the more experienced five.

New York State Teachers — 34**Pratt — 39**

With this game the Pratt team resumed its winning streak. Geiser was one of the main stars of the game with his fast passing. The half ended with Pratt in the lead by four baskets. Towards the end of the game N Y S. Teachers crept up to the Pratt team, resulting in a great deal of excitement on the spectators part.

Alumni — 15**Pratt — 35**

This was a regular Alumni reunion, both players and spectators. Many of the old stars were back on the floor, but they were unable to do much against the trained Pratt team, which was able to score almost at will. Geiser was the leading scorer of the game.

Northeastern — 27**Pratt — 29**

One of the most exciting games of the season. The game was half and half from beginning to the very end. Zeitlin showed some excellent shooting at a distance. Both Condict and Mandle played one of their best games of the season.

Providence — 31**Pratt — 35**

At first the game looked like another Pratt victory but the visitors gradually picked up and passed the Pratt five towards the end of the game. "Johnny" Reiser resumed his sixteen point scoring

Brooklyn Poly — 32**Pratt — 34**

With the gym crowded beyond its capacity Pratt turned back the determined Poly five. At the half we led with six baskets. The second half started with the visitors gaining and the crowds became almost hysterical at the end. "Johnny" Reiser scored another sixteen points.

Mass. State — 40**Pratt — 35**

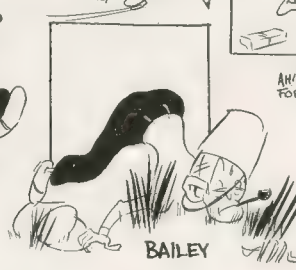

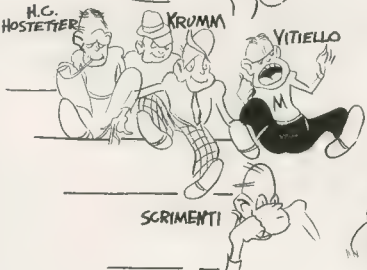

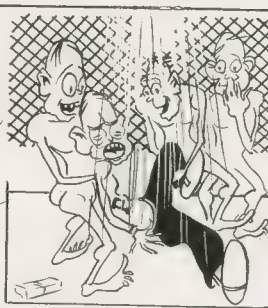

This marked the first game of the Pratt tour. The game opened with Pratt taking the lead at the half with a score of twenty four to sixteen. During the second half the team weakened and Mass. State's five were able to make it a victory

Trinity — 38**Pratt — 35**

The second game of the tour proved no better than the first, but we gave our old rivals, Trinity a mighty good fight for the game. Condict was playing a very fast and sure game. Johnny Reiser showed them how we score at Pratt by making eighteen points.

Brooklyn Poly — 19**Pratt — 46**

A game that marked a good ending to a very successful basketball season. The rivals offered very little competition. "Johnny" Reiser raised his scoring average by making twenty-eight points. Charles Geiser who acted as Captain this year, ended his basketball career at Pratt with this game. Another loss is the hard player, George Cummings.

V A R S I T Y B A S E B A L L

The regular custom of having the previous year's baseball record is being followed out this year in order that Prattonia may come out on time.

Regular spring practice was started in the gymnasium. This gave Coach McKillop a chance to pick out some new material to supplant the boys who left through graduation. With the loss of Frank Boemerman it looked like a tough season for us, although the return of Timm, Bose, Perrin, Zalinsky and Watkinson made things look a little brighter

The season started off with Concannon on the mound and the first game was played with Brooklyn College. In the beginning it looked very favorable for Pratt, as we had a lead of one to nothing. By degrees the opponents picked up and the game ended in their favor with a score of five to ten.

The Black and Gold went to Hoboken for their second game and played the old rivals, Stevens. After a defeat for their first game, Pratt started this second one with plenty of 'pep' and brought in five runs the first inning. Stevens then started to play harder and the game ended by Pratt winning with a slight lead.

Middlebury was the third game on the schedule. The fifth inning ended with a lead of three runs for Middlebury. At the end of the sixth it was a tie, with both teams doing their best to get that extra run for the lead. The seventh was our big rally and we left the field with our second victory.

The following schedule was arranged by the manager:

	Pratt	Opponents
Brooklyn College	5	10
Stevens	7	5
Middlebury	7	5
Wagner College	15	21

INTERCLASS SWIMMING

The interclass swimming championship was won by the second year Electrical class, who showed a great improvement over the previous year's swimming. They were able to break some of the pool records and hang up some new ones which are going to be mighty hard to beat. The events with new records are: The two-length free style, the medley relay and the back stroke.

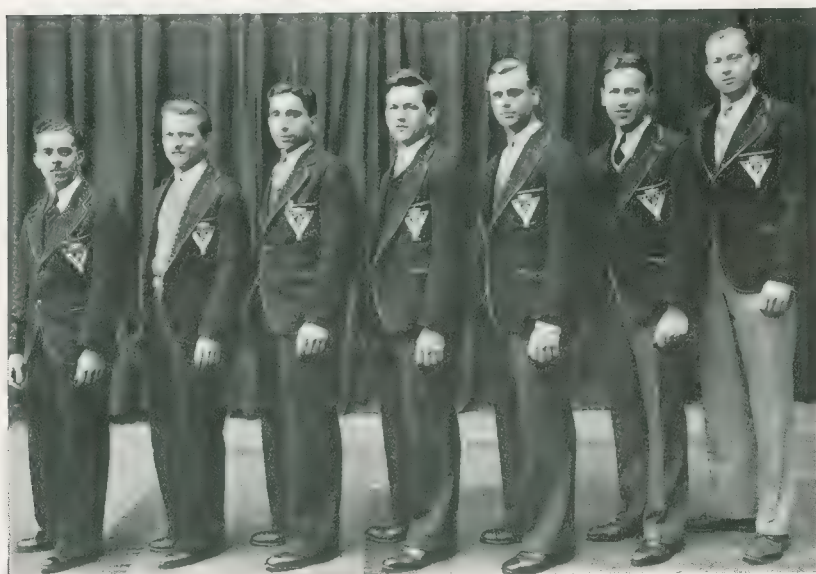

This is the first five-man team that has been able to win the interclass championship. The team was made up of the following men. J Unverzagt, Captain L. Buhler R. White C. Ingraham, and E. Hagelberg

The team owes a great deal of its victory to their manager, J. O'Brien, and Marty Fowler who has coached all of the class teams and has conducted Red Cross life saving instruction during the past season.

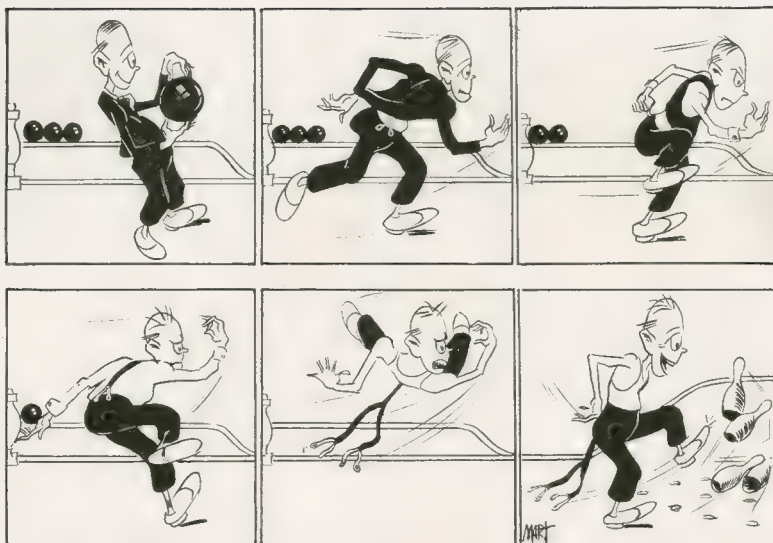

B I G P I N S

The Senior Mechanicals upheld the Mechanical tradition in winning the Interclass Bowling Championship by winning every match during the season.

Every member of the team did some outstanding bowling and set up some records that will be hard to beat by any of the coming teams. The team was captained by William Moore, who led the field in high scores. The remainder of the team consisted of William Bennet, Joseph Wetherell and John Johnson.

The first game with the Chemists was the only serious threat throughout the whole season. They showed some good bowling in the beginning but were finally nosed out by the Mechanicals. The rest of the season was easy going

The first year Mechanicals have a record which is going to be hard to keep with all the good material in the first year classes.

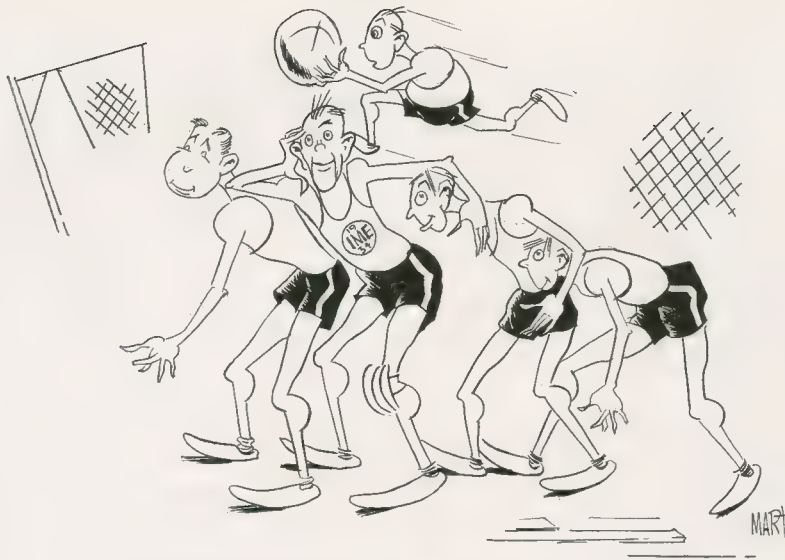

D U C K P I N S

The Mechanical tradition of winning all bowling honors was broken this year by the Architects, who won without the loss of one match.

An unusually fine series of matches were held this season. Many of the games were very close, which provided plenty of interest to the team supporters.

The season ended with the Architects beating the Artsmen.

The team wishes to thank their manager, A. Scramenti, for his work, both managing and bowling on the team.

INTERCLASS BASKETBALL

The interclass basketball games were won by a very exceptional Mechanical team this year. With the addition of Bill Moore and Joe Giancoli, the squad was able to show all competition what a class team could do with just a little co-operation. They were able to show the Junior Varsity some fairly good competition during practice games. The team was able to outscore every class team by a very wide margin.

The first half of the season was won by a play-off with the Artsmen. The second half ended with a complete victory for the squad.

The team was managed by William Essig, who deserves a great deal of credit for his fine work in arranging games and managing the team.

I N T E R C L A S S S O C C E R

It was gratifying to note the great interest given this sport by participating players and spectators. An exceptionally large number of candidates turned out for the first practice sessions of the various teams. This resulted in a well-balanced league.

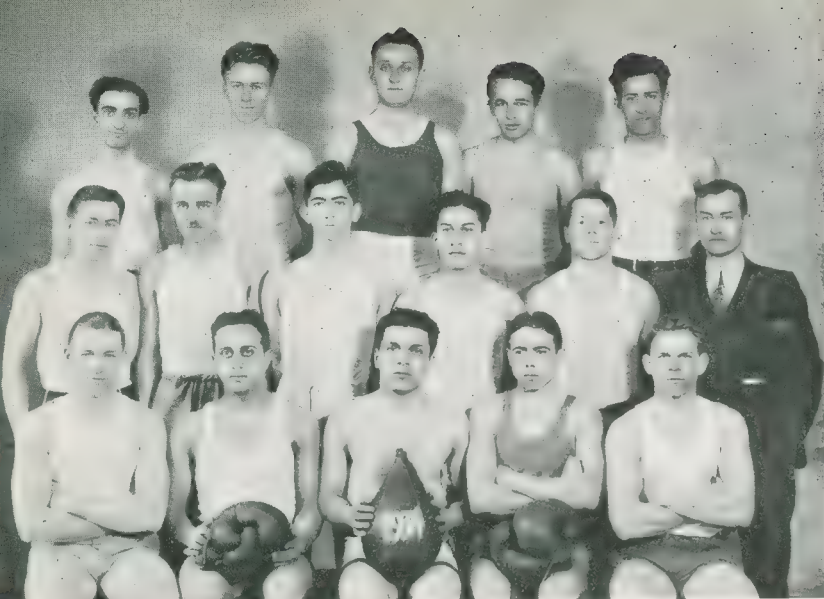

The Architects, Artsmen, and Mechanical II teams were generally considered as the best teams on the field. This was largely due to their reputation gained the previous year.

After the first week, the Architects clearly showed their supremacy over the rest of the field and clinched the championship by defeating a great Mech. II team 1 to 0 in one of the best contested games ever witnessed on Pratt Field, to finish the season undefeated.

The Architects owe a great deal to William Rendo captain and goalie, who was generally considered the best player on the field. The fact that not one goal was scored against Rendo was the outstanding feature of these games.

The boys are hoping that soccer will be made a varsity sport soon. Surely the enthusiasm shown for this sport warrants such a move.

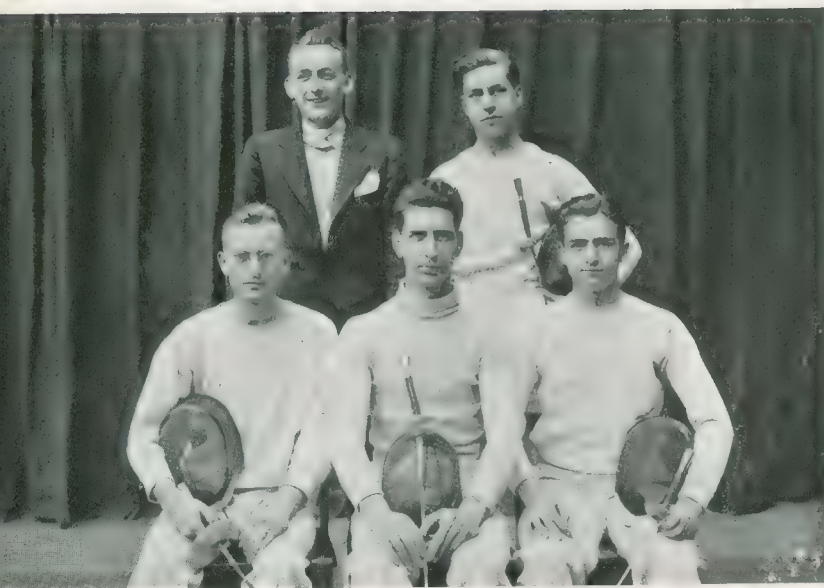

B O X I N G

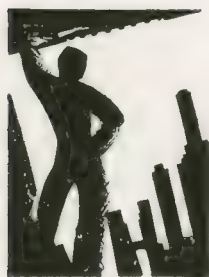

The Boxing class has made some exceptional strides this year under the tutelage of the capable Philip Robert. It is hoped that in the future years the team will be able to hold outside matches. The meetings were well attended and enjoyed by a few matches at basketball games. These were very interesting and showed some real talent in the class.

The most promising contender for the student instructorship next year seems to be W Anderson. Other team members who have received a good knowledge of this sport are well prepared for any outside competition in the coming year.

M E N ' S F E N C I N G

This year our athletic department was aroused by the student interest in Fencing. Interest is rightly said, but fencing was made to mean more than just the word fencing by Coach Stevens. By his splendid cooperation and by the concentrated work of our men, we feel it growing to be one of our greatest major sports.

DEPARTMENT OF PHYSICAL EDUCATION FOR WOMEN

The year for the Department of Physical Education for Women is divided into three seasons, Fall, Winter and Spring. At the conclusion of each of these seasons, tournaments and meets are held to determine the championship teams in each sport.

FALL

Volley ball tournament won by Junior Dietitians from Second Year Art, 45-30.

Hockey tournament won by Second Year Art from Junior Costume Design and Institutional Management, 1-2.

Swimming meet won by Fine and Applied Arts from Household Science and Arts, 52-33.

WINTER

This year we have deviated a bit from our Winter course, that of a dancing and gymnastic period a week. Elective clubs are now being held in basketball, dancing and fencing.

SPRING

Baseball tournament won by Costume Design I and Institutional Management from Second Year Art, 7-2.

Volley ball tournament won by Third Year Art from Senior Dietitians, 46-34

Swimming meet won by Household Science and Arts from Fine and Applied Arts, 71-57

The competitive gymnastic meet, held in April, 1933 was won by the School of Fine and Applied Arts with a score of 78.1 to the score of the Household Science and Arts of 77.9.

Senior Life Saving Test was passed by the following: Margaret Cox, Illustration IX, Dorothy Fox, Illustration IX, Wilma Gould, Illustration IX, Hortense Blumenkranz, Illustration IX, Jane McAllister Industrial Design II.

The Rest House can well be praised for its good administering to its slightly ill and dejected personages who have been its patrons. In those months in the middle of the scholastic year when the Institute reeks with over-worked minds and sore throats, the rendering of services by Miss Hale and Miss Hatch can well be considered motherly. This is not all we must consider when we speak of the Rest House since it also carries on a large business in the ordinary required first-aid hurts.

The new students who come to the Institute and have fallen victims of some illness and need attention, often shirk their duty by not seeking out this health center at 244 Vanderbilt Avenue. But once they become customers, it is often hard to keep them away from a place that makes mother nature return to neutral zones in the way of perfect physical ability

DOROTHY BUTLER

None knew thee but to love,

Dietetics—1934.

Mr. Edward H. Finlayson, instructor in the Department of Architecture, died on Tuesday, January 16, 1934. Although Mr. Finlayson had been with us for only three years, he had proven himself to be typically "Pratt" in every way. His personality was such as to make him greatly liked and respected by both students and instructors.

Mr. Finlayson was graduated from Stevens Institute in 1911 and had a long and varied experience as a consulting engineer before coming to Pratt, where his work was with all three of the Architectural Classes. It will be difficult to replace him.

SLAVES TO THE CAUSE

What is it? Sure enough, it has a nose, eyes, and a crazy mop of hair—all together it sort of resembles a human. Got funny habits, though—could be seen most any night trudging out of the art school and off toward a restaurant about 7:30. Claims N. R. A. a myth. Used to be a rumor that he signed up to be an engineer. "One, two, three,"—gone again, maybe it's only a phantom—and again, maybe only the editor.

"Half tones; tint blocks; bleeds; it must balance; bosh! I didn't allow for that run; well, rout that out—" Too bad, so young, too. But they say it began way back last July—there was some sort of election and it began soon after that. It was then, while still out West, that he took to carrying that junk he calls a dummy around with him, too.

What a life! Treated like a swarm of mosquitoes. "Hey got some money for me? Where are your receipts? Any new subscriptions?—sure it's due now!" Well, maybe he should have stuck to the sea. But then, again, perhaps a system incorporating both would work. How about a sign such as this? "A Free Ocean Voyage to anyone who pays up." It might work!

"Yes, I told them to be here at four o'clock, and see what I got, a nice row of chairs—and my schedule!" "Well, you might take a few minutes off and have someone introduce you to your instructors—you know you did pay tuition here; again, you might start punching the time clock at Arthur Studios or Scientific. By the way—heard that Mr Dale and Miss Condit almost made a complaint about your attendance."

Be at ease once more, my charming ladies, for this book before you should comfort you? 'tis true, alas, too true, he would paint such an alluring picture of an evening with Guy Lombardo—only to find galleys—and galleys, and the evening whiling away with—
Ruth Nickolas.....Scottie
231 Blossom St., Blackstone, Mass.
Etc., etc.
and Guy would be mixed with static.

Hi Lois:

Boy, I had a peach of a time in
Blountsville and your further invitation I
hope to take advantage of. You've been
awfully nice and understandingly helpful, Lois.
Thanks you.

I trust you, which is saying a lot, I
think. Because you are the only girl that
ever inspired that in me.

I admire you, Lois, for your sincerity, your
modesty for any fun, and your very capable
~~and~~ ability to take care of yourself - others as
well.

Yours.

a small girl.
I am quite happy.
I am 14 years old.

Dear Lois,
Here's luck and all that sort
of thing. Love

 Nick,

Dear "little" Lois -

Well it's all over!

Have a swell time next year
and a little advice - "listen!" One
